## TSMC Earning: Despite Rev Upside, Margin Headwind Persists, Which Was Expected

## Call to action

We are updating estimates following TSM's 2Q21 earnings report/conf call, while PT remains unchanged. All in all, margin pressure should ease by early 2022, driven by higher blended ASPs. But, FCF margin pressure is expected to sustain into 2023 given the higher working capital requirement while capex is expected to remain at elevated levels.

## HIGHLIGHTS

As was expected, TSM guided to higher than expected revenue trends into 2 H 21 though margins remain under pressure. Midpoint of 3 Q 21 guide implies $11 \% \mathrm{Q} / \mathrm{Q}$ growth vs. consensus of up $10 \%$. OM is expected to trend flattish into 3 Q 21 . Additionally, we note leading edge nodes (like N7/5) now require higher working capital due to longer manufacturing cycle times. This, combined with elevated capex, should limit FCF margin to below 10\%. Other take aways are: (1) as was expected, smartphone related revenues were down in 2Q21, though HPC improved particularly by a higher mix of China based customers, (2) smartphone is expected to rebound into 2 H 21 , (3) capex guide for 2021 has remained unchanged at \$30B though there remains prospects of upside ( $\sim \$ 0.5 \mathrm{~B}$ ), (4) blended wafer prices are expected to continue to increase, (5) N3 is expected to go into HVM in 2 H 22 (and not a real material change to our expectations since Apple will move its SP AP to N4 in 2022),
(6) there are increased prospects of the 2nd phase of the Arizona fab, which we estimate to drive the capacity there to $40 \mathrm{k}+$ wpm (of N5 capacity) by YE24 and above the current expectations of 20 k wpm (from the 1st phase).

|  | RATING |  | PRICE TARGET | PRIOR EPS |  | CURRENT EPS |  |  |

| Calendar year $=\mathrm{cy}$ <br> Fiscal year $=\mathrm{fy}$ |  |  |  |  |  |  |  |  |

- As was already implied in TSM's monthly sales figures, TSM reported 2 Q 21 revenue of NT\$372.145B, $+19.8 \% \mathrm{Y} / \mathrm{Y}$ and $+2.7 \% \mathrm{Q} / \mathrm{Q}$. Revenue growth driven by strength in HPC (and particularly China) and Automotive end markets. This compares to consensus of NT\$372.05B and was above the midpoint of the guided range of NT\$366B-NT\$375B. Reported EPS of NT\$5.19 came in lower than SFG/consensus of NT\$5.35/NT\$5.23.
- Reported GM of $50 \%$, which came in below SFG/consensus of $51.3 \% / 51.0 \%$, is down -300 bp $\mathrm{Y} / \mathrm{Y}$, and on the lower end of the guided range of $49.5 \%$ to $51.5 \%$. Reported OM of $39.1 \%$ also was below SFG/Consensus of $40.3 \%$, down $-310 \mathrm{bp} \mathrm{Y} / \mathrm{Y}$ and at the low end of the guided range of $38.5 \%-40.5 \%$.

[^0]
## HIGHLIGHTS

Continued from previous page

- GM came in lower as a result of FX headwinds ( $\sim 50$ bpts) and the mix shift towards N5. The real FX exchange rate came in at 29.1 NTD/USD, compared to the previously assumed 28.4 NTD/USD. Slower rate of cost improvement and inventory valuations also impeded GMs. Back end profitability expected to improve going forward (but still below the corporate average).
- TSM guided 3 Q 21 revenue of NT\$407B-\$416B (US\$14.6B-\$14.9B) vs. SFG/consensus of NT\$407B/NT\$409B. The midpoint implies $\sim 11 \%$ Q. Q growth. GM and OM are guided to be $49.5-51.5 \%$ and $38.5-40.5 \%$, which compares to SFG/consensus of $51.2 \% / 51.8 \%$ and $39.8 \% / 41.1 \%$. For FY21, TSMC estimates Semi (ex. Memory), Foundry Market, and its own sales to grow $17 \%, 20 \%$, and $>20 \%$ respectively on a USD basis.
- TSM reiterated its revenue guidance of 10-15\% CAGR from 2020 to 2025 , and noted that it is expected to be at the high end of this range. TSM believes that its L-T targets of $50 \% \mathrm{GM}$ and $39 \% \mathrm{OM}$ are sustainable, and that it can achieve an ROE of $>20 \%$.
- HPC now makes up $39 \%$ of revenues, up from $33 \%$ a year ago. Much of this revenue share has been gained at the expense of SP, which had declined to $42 \%$ of revenue from $47 \%$ a year prior. HPC is expected to be the largest driver of revenue growth over the next 5 years, and will especially drive traction in leading node adoption. Automotive also continues to gain traction, increasing $12 \%$ sequentially in the quarter. Trends related to safety, ADAS, and electrification expected to drive incremental silicon content in auto.
- 2 Q 21 CapEx was $\$ 6.0 \mathrm{~B}$ (+41\% Y/Y; -33\% Q/Q). TSM has previously announced that it expects to spend \$100B CapEx from 2021 to 2023 in total, and had previously guided $\sim 30 B$ in capex for 2021. ~\$12B of capex will be allocated towards this buildout of the Arizona fab, $\sim \$ 8 B$ of this to be spent in the next 3 years.
- TSM continues to build N5/N3 capacity throughout Taiwan. TSM plans to expand operations in various Taiwanese geographies in an effort to keep Taiwan the home base for leading edge manufacturing, citing efficiencies stemming from close proximity. TSM continues to invest in its Arizona 5 nm fab, and expects equipment installations to commence in 2 H 22 with 20 k wpm capacity ramping by early 2024 . The company also noted it is considering the 2nd phase of the expansion in Arizona, which we believe could increase the overall capacity to 40k + wpm by YE24.
- Ramp of specialty technologies/trailing edge in China continues to progress, with 40 k wpm capacity expected in 2023. TSM does not rule out the possibility of wafer fabrication in Japan, and is currently conducting due diligence to determine feasibility.
- N5 continues to experience strong demand, driven by SP and HPC, and is expected to account for $\sim 20 \%$ of total wafer revenue in 2021. N4 went into production this quarter, and is expected to be in full volume production by 2022. For N3, production is expected to begin in 2H22, and TSM notes high levels of customer engagements and tape outs. N7 remained the largest node by revenue in 2 Q at $31 \%$ of total revenue, but is down $4 \%$ sequentially. This mix has shifted towards 5 nm revenues, which improved by $4 \%$ to $18 \%$ of total revenues.
- Our updated CY21/22 EPS estimates of NT\$22.40/27.25(US\$4.01/4.88) compared to the current consensus of NT \$22.66/26.29 (US\$4.04/4.68)

## Catalysts

TSMC - TSM:

1) Monthly sales, 2) downstream data points, 3) competitive landscape.

## Downside or Upside risk

Taiwan Semiconductor - 2330 TT:
Upside risk of NT660 is $\sim 22 x$ better than expected "peak" EPS of NT39.00 and $\sim 9 x$ current BV

TSMC - TSM:
Upside risk of $\$ 135$ is $\sim 22 x$ better than expected "peak" EPS of $\$ 6.20$ and $\sim 9 x$ current BV.

## Price target valuation and risks

Taiwan Semiconductor (2330 TT, Price: TWD613.00, Price Target: TWD590.00):
Our price target of NTD 590 is based on $\sim 22 x$ our CY22 EPS estimate and $\sim 7 x$ P/B. We use CY22 estimates given our updated view and increased confidence in wafer shipment.

Downside risks include but are not limited to: 1) increased competition, 2 ) increased margin pressure given the escalating cost of manufacturing, 3) geopolitical risks given the location of Taiwan

Upside risks include but are not limited to: 1) better than expected revenue diversification, 2) better than expected ASP trends, 3) better than expected GM profile.

TSMC (TSM, Price: \$124.39, Price Target: \$105.00):
Our price target of USD105 is based on $\sim 22 x$ our CY22 EPS estimate and $\sim 7 \times$ P/B. We use CY22 estimates given our updated view and increased confidence in wafer shipment.

Downside risks include but are not limited to: 1) increased competition, 2 ) increased margin pressure given the escalating cost of manufacturing, 3) geopolitical risks given the location of Taiwan

Upside risks include but are not limited to: 1) better than expected revenue diversification, 2) better than expected ASP trends, 3) better than expected GM profile.

## Analyst Certification

 expressed in this research report.

## Important Disclosures

SFG is a market maker in the securities of TSMC (TSM)
TSMC (TSM) is a foreign security with the primary market for the shares outside of the U.S. Shares trade in the U.S. but may be less liquid than the primary market. Clearing and settlement for the shares may be different than for U.S. securities.
Susquehanna International Group, LLP (SIG) is comprised of a number of trading and investment related entities under common control, including Susquehanna Financial Group, LLLP (SFG). SIG, its affiliates and/or its principals may have long or short positions in securities or related issues mentioned here. SIG, in its capacity as specialist and/ or market maker may execute orders on a principal basis in the subject securities. Information presented is from sources believed to be reliable, but is not guaranteed to be accurate or complete. Past performance should not be taken as an indication or guarantee of future results. Hyperlinks provided in this report are for your convenience. Please be aware that the products and information supplied on these hyperlinked pages are not endorsed or approved by SFG.
The following data elements on this report were sourced from Bloomberg LP: Price (yesterday's close), 52-week high, 52-week low, Shares outstanding, Average daily trading volume, Volume (contracts). Any others will be specifically sourced.
SFG employs the following rating system:
Positive: We expect this stock to appreciate by at least $15 \%$ over the next 12 months.
Neutral: We expect this stock to perform within a range of $+/-15$ percentage points over the next 12 months.
Negative: We expect this stock to depreciate by at least $15 \%$ over the next 12 months. .
Suspended: The previously published rating and/or estimates are currently suspended and under review.
Prior to July 2015 our rating system also required a $20 \%+/$ - expected return over 12 months to initiate with a Positive/Negative rating.
Defined Credit Terms
Gross debt + preferred TEV: (Gross Debt + Preferred) / Total Enterprise Value (expressed as a \%).
Net debt/EBITDA: Net Debt (gross debt less cash on hand) / EBITDA = forward year EBITDA estimate.
Free cash flow: Forward EBITDA estimate less cash taxes less cash interest less total capex.
FCF yield: FCF Yield ((FCF/ Fully Diluted shares outstanding/current share price) (expressed as a \%)).
YTM: Yield-to-maturity ("YTM") implied by any of its bonds outstanding that are due in 5 years ((or closest to)(expressed as a \%)).

Susquehanna Financial Group, LLLP

5-yr treasury yield: 5-year US Treasury yield (expressed as a \%),
Volatility Definitions
Volume: The 20-day average option contract volume for the symbol.
Skew Rank: The current day's Skew values compared to the past year's worth of skew values and then rank the current day's value. Past year in the calculation is 252 previous trading days which includes the last trading day.
Implied Volatility: Implied Volatility is the at-the-forward volatility level implied by market option prices for 90 days. While implied volatility is specific to the time frame selected, it is always presented as an annualized standard deviation.
Realized Volatility: It is the Realized Volatility of a financial instrument over 90 days. Generally, this measure is calculated by determining the average deviation from the average price of a financial instrument in the given time period. This measure is frequently compared with implied volatility to determine if options prices are over- or undervalued. It is also known as historical volatility.
